Software Developer | Backend & API Engineering

PROFESSIONAL SUMMARY

Software Developer with 4+ years of professional experience building backend services, REST APIs, authentication systems, and enterprise applications. Strong hands-on background in Java, Python, Node.js, Spring Boot, SQL, Redis, OAuth2, microservices, and automated testing. Experienced in delivering maintainable APIs and services while working across development, testing, debugging, and production support.

PROFESSIONAL EXPERIENCE

OpenText — Software Development & Engineering | 2017 – Present

Software Developer | 2025 – Present

- Designed and deployed backend services for AI-powered enterprise applications using modern LLM tooling.
- Maintained distributed microservices and supported reliable service-to-service workflows.
- Integrated vector databases into backend services for scalable knowledge retrieval.
- Developed multi-agent workflows with LangChain and LangGraph.
- Improved application workflows through prompt optimization and backend orchestration.
- Maintained CI/CD standards and automated testing practices.

Software Developer | 2023 – 2025

- Developed and maintained RESTful APIs supporting enterprise application functionality.
- Integrated SQL data stores with backend services and application workflows.
- Implemented OAuth2 authentication flows for secure API access.
- Built Redis-based token lifecycle management for authentication services.
- Developed JavaScript and EJS interfaces consuming backend services.
- Worked within Agile teams across implementation, testing, debugging, and maintenance.

Associate Quality Assurance Developer | 2022 – 2023

- Built Selenium and Python automation frameworks for API and application regression testing.
- Executed regression testing across environments to validate releases.
- Analyzed defects and collaborated directly with developers on fixes.
- Created diagnostic scripts to isolate difficult software issues.
- Implemented accessibility compliance improvements.

Software Development Intern | 2021

- Led regression testing initiatives and supported software release validation.
- Documented and prioritized defects for engineering teams.

Software Development & QA Intern | 2017 – 2020

- Developed JavaScript QA tools supporting automated and repeatable testing workflows.
- Implemented performance enhancements and participated in peer code reviews.
- Contributed to software quality and engineering best practices.

CORE TECHNICAL SKILLS

Backend:	Java, Python, Node.js, Spring Boot, REST APIs, Microservices, Distributed Systems
Databases:	SQL, Redis, Vector Databases
Security:	OAuth2, Authentication, Token Management
DevOps:	CI/CD, Automated Testing, Git, Cloud Computing
Testing:	Selenium, JUnit, TDD, Regression Testing
AI:	LangChain, LangGraph, LLM Applications, Vector Databases

Frontend & Tools: JavaScript, TypeScript, HTML, CSS, EJS, Postman, JIRA

EDUCATION

Bachelor of Computer Science — Carleton University

High School Diploma — Appleby College

PROJECTS

AI Resume Assistant

- Built an AI-powered resume chatbot using LLMs, vector search, and REST APIs.
- Deployed scalable backend infrastructure with CI/CD pipelines.

Sports Betting Notifier

- Developed a real-time Discord bot for sports betting alerts.
- Designed configurable user preferences and alert routing.
